
a SWOT WSE and gauge water level
422 gauges; 7,615 pairs
r = 0.422 ± 0.351
Cumulative gauge fraction
Gauge-level Pearson r
b Calibration WSE–width relationship
Observed calibration width
Gauge 30700300 · fold 3
Corrected relationship
Width (m)
WSE above lowest anchor (m)
c Effect of width correction on NSE
NSE (across-gauge validation pairs)
Observed width
Corrected width
Fixed hydraulic parameters
Jointly calibrated parameters
d Effect of width correction on RMSE
RMSE (m³ s⁻¹)
All validation WSE
Within calibration WSE range
